

Bitburger Gespräche in München

Band 2: Planen, Erklären, Zuhören – Wie Großprojekte mit Bürgerbeteiligung möglich werden

Hrsg. v. der Gesellschaft für Rechtspolitik, Trier, und dem Institut für Rechtspolitik an der Universität Trier

[Planning, Explaining, Listening – How large-scale projects can be made possible with public participation.]

Published in German.

In view of large-scale projects such as »Stuttgart 21,« the call for more public participation is more relevant today than ever in the general public's awareness, and it involves various problems. The articles in this second volume of the Bitburger Discussions in Munich not only demonstrate the problems linked to the topic of »public participation,« they also present approaches to solving these problems.

Gesellschaft f. Rechtspol. Trier No current data available.

Institut f. Rechtspolitik, Univ. Trier No current data available.
