Der Ursprung des Staates

Die naturrechtlich-rechtsphilosophische Legitimation von Staat und Staatsgewalt im Deutschland des 18. und 19. Jahrhunderts

[The Origin of the State. The Legitimation of the State and State Authority in 18th and 19th Century Germany from the Perspective of the Law of Nature and the Philosophy of Law]

Published in German.

Jan Rolin examines theories on the origin of the state in numerous modern writings which deal with the theory of the state. In doing so, he uses an approach based on the history of ideas which consistently implements those demands made by the so-called new history of ideas. In addition to those texts which were written by well-known authors, he analyzes innumerable less well-known authors. This study is not restricted to an overview of the development of the theories in the laws of nature and of the philosophy of law regarding the legitimation of the state and state authority in the 18th and 19th century; it also analyzes the development of topoi which are central to our modern political and social language, such as freedom, sovereignty, constitution, the people and the nation and the question of the state's purpose.

Jan Rolin Geboren 1975; Studium der Rechts- und Wirtschaftswissenschaften in Bayreuth; 2004 Promotion; zur Zeit Rechtsreferendar in der Freien und Hansestadt Hamburg.
