

Kai von Lewinski

Die Matrix des Datenschutzes

Besichtigung und Ordnung eines Begriffsfeldes

[The Matrix of Data Protection. A Survey and Organization of a Concept.]

Published in German.

Data protection is an important concept which is well established but unclear. Nevertheless a clarification of this term is vital for the communication in jurisprudence and between the various scholarly disciplines and especially for a (transatlantic) comparative law analysis. Kai von Lewinski's study deconstructs the concept of data protection and separates it into its various parts.

Kai von Lewinski Geboren 1970; Studium der Rechtswissenschaft und später auch der Geschichte in Heidelberg, Berlin (FU) und Freiburg; 2000 Promotion; 2010 Habilitation; Wintersemester 2010/11 Lehrstuhlvertretung an der Universität Bonn.

unrevised e-book edition 2021;
Original edition 2014; 2014.
XVIII, 99 pages. luG 1
