Eine Bremse für die Staatsverschuldung?

Verfassungsmäßigkeit und Justitiabilität des neuen Staatsschuldenrechts

[Brakes on the National Debt? Constitutionality and Justiciability of the New National Debt Law.]

Published in German.

The debts of the German federation and the federal states grew to almost 2 trillion euros in 2010. Will the new »debt brake« stop this development? In order to answer this question, Maxi Koemm studies the compatibility of constitutional changes with the guarantee of perpetuity in Article 79 Paragraph 3, the constitutionality of the ancillary legislation and the justiciability of the new debt limit.
