Emil Lasks Grundlehre

[Emil Lask's Fundamental Philosophy. By Stehpan Nachtsheim.]

Published in German.

The book contains a critical analysis of and tribute to the fundamental philosophy of Emil Lask, a neo-Kantian well known for his legal philosophy but apart from that previously neglected. Above all the book deals at length with his doctrine of the self-justification of philosophy (ultimate justification) in a theory of the categories of philosophical cognition and its object.
