[Freedom of Testation / Testierfreiheit.]

Published in German.

Freedom of testation is a fundamental principle of all succession laws in Europe and elsewhere. It is however subject to limitations, the main one being the so-called right to a compulsory portion. In this volume, the authors discuss freedom of testation from a comparative perspective. They also deal with another dimension of freedom of testation: How can the law make sure that a will constitutes an expression of the testator's right of self-determination?

Reinhard Zimmermann ist Direktor am Max-Planck-Institut für ausländisches und internationales Privatrecht und Professor an der Bucerius Law School, Hamburg.
