ISBN 978-3-16-151320-6
eBook PDF 34,00 €

Published in German.

Oliver Holtemöller explains the role of money and interest and theoretical foundations of monetary policy in developed economies. In particular, the following issues are addressed: functions of money and interest; financial system and asset prices; empirical and theoretical relationships between money, interest rates, output and inflation; goals, strategies and institutional organization of monetary policy; international aspects of monetary policy. A special focus is put on the link between theoretical models and observed economic developments in selected economies.
