

IT-Sicherheitsforschung und IT-Strafrecht

Herausgegeben von Sebastian Golla und Dominik Brodowski

[IT Security Research and IT Criminal Law.]

Published in German.

A digital society depends on secure information technology systems and processes. However, IT security research, which makes a considerable contribution to IT security, is exposed to serious legal and, above all, criminal law risks. There is therefore a need for viable yet scientifically sound mitigation of such risks. This volume is dedicated to a thorough analysis of this problem and possible solutions. It originates from a workshop held at and funded by the Center for Advanced Internet Studies (CAIS) in Bochum.

Sebastian Golla ist Juniorprofessur für Kriminologie, Strafrecht und Sicherheitsforschung im digitalen Zeitalter an der Ruhr-Universität Bochum.

Dominik Brodowski ist Inhaber des Lehrstuhls für Strafrecht und Strafprozessrecht an der Universität des Saarlands.
