

Jan Peter Schmidt

Itinera hereditatis

Strukturen der Nachlassabwicklung in historisch-vergleichender Perspektive

[Itinera hereditatis. Administration of Estates from a Historical-Comparative Perspective.]

Published in German.

The law of succession is not only concerned with determining the recipients of a deceased's persons assets, but also with implementing the envisaged order of distribution. In his historical and comparative analysis of the »how« of succession law, Jan Peter Schmidt reveals the underlying structures and policy issues. Hereby, he enables new perspectives on the national regimes and shows possibilities for reform.

Jan Peter Schmidt ist Wissenschaftlicher Referent am Max-Planck-Institut für ausländisches und internationales Privatrecht in Hamburg.
