Kriminologie

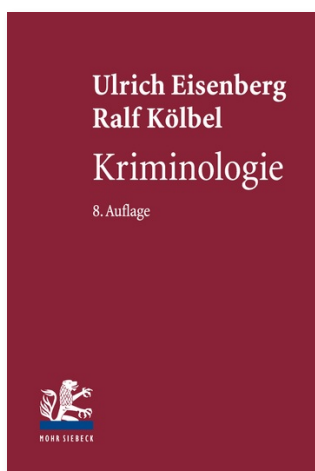

[Criminology. 8th, completely revised edition.]

Published in German.

Criminology is the empirical subject which addresses deviant and criminal behaviour, its social definition as well as its manifestations and control. The new and thoroughly revised edition of this work, a classic work of German-language criminology literature, offers a comprehensive and up-to-date overview of the discipline. Those parts which discuss the criminological study of criminal legislative procedure have been newly structured and expanded in their entirety. In addition, all those text passages which deal with the research on the practice of law enforcement institutions have been newly conceptualized, and considerably more emphasis is placed on the handling of cyber crimes.
