Macht und Gesetz

Grundprobleme der Politik und der Ökonomik

[Power and Law. Fundamental Problems in Politics and Economy.]

Published in German.
The investigations in this book are on the problem of the relationship between politics and the economy as objects of the political theory and the economic theory. Both theories are part of the »Herrschaftswissen« as defined by Max Scheler. They are based on a general theory of action. This theory as well as the political and the economic theory which is developed from the theory of action is understood as a system of categories which contains the laws of the fields concerned. Central categories are the categories of power and domination. The political and economic theory are conceived of as the basis of rational action in politics and in the economy.
