### Martin Luthers theologische Grundbegriffe

Published in German.

This textbook is an inventory of Martin Luther's most important theological terms, compiled using citations from the Weimar Edition of his writings. The lexicon seeks to present Luther's theology using the terms as a guide, allowing these to speak through the reformer's own words, but in a modern form of language that lets the original terminology and register shine through. Information and details of recent literature on the respective terms complete the entries, while an index enables the reader to find terms without a dedicated entry to be found. The textbook fills the gap between concordances and systematising accounts of Luther's theology, and aims to provide an introductory and orientating tool for students, clergy, and religious education teachers alike.

Reinhold Rieger ist Akademischer Oberrat und außerplanmäßiger Professor für Kirchengeschichte an der Evangelisch-Theologischen Fakultät der Universität Tübingen.
