Nebenbestimmungsfeindliche Verwaltungsakte

[Anti-Supplementary Provision Administrative Acts.]

Published in German.

Are there administrative acts that must not be subjected to conditions or other ancillary clauses? Although this is broadly approved of in German jurisprudence in many instances, Sebastian Traub reveals that there are numerous blurred areas and cracks in the theory. By refocussing away from traditional categories, he develops a new and sharper approach that makes way for significantly more flexible forms of autonomy in the administrative decision-making process.
