## Religionspädagogik

[Religious Pedagogy.]

Published in German.

Bernd Schröder deals with religious pedagogy from five different, methodically deliberated perspectives. He gives the subject historical depth, making a comparison with religious instruction in other religions and countries. He combines empirical assessments with the systematic development of the concept without losing sight of the interest in a practical and activity-oriented focus. In this way, the author has created a comprehensive panorama of challenges to religious pedagogy and presents solutions to these challenges for schools and communities, media and families as well as the public. He gives religious pedagogy a profile as a theological discipline which is connected to a great many theological and non-theological disciplines and whose results are examined, evaluated critically and continued with its own focus on education from a Christian and in this case a Protestant perspective.
