Studien zum Corpus Iohanneum

[Studies on the Corpus Iohanneum.]

Published in German.

This volume contains 27 articles on the Corpus Iohanneum. These articles focus on the prologue, the description of how the Word entered the world, the narrative and theological concept of the Gospel and its redactional adjustments as well as on 1 John as its oldest »commentary.« The early church saw the Gospel as the chief witness to the trinitarian doctrine. Its »high Christology«, which saw Jesus not only as Israel's Messiah but moreover as the Son of God sent from heaven, does however seem to be inextricably combined with its harsh polemic against »the Jews«, which helped to develop its own identity. Is Christian anti-Judaism also a legacy of the Johannine concept of Jesus, which portrays him as a stranger in Israel? Michael Theobald shows that it is only possible to deal with the Gospel in a hermeneutically responsible manner today on the basis of its historical context.
