

Gerhard Ebeling

Studium der Theologie

Eine enzyklopädische Orientierung

2. Auflage, neu hrsg. u. m. einem Nachw. versehen v. Pierre Bühler u. Thomas Schlag

[The Study of Theology. An Encyclopedic Orientation. 2nd Edition, with an Afterword by Pierre Bühler and Thomas Schlag.]

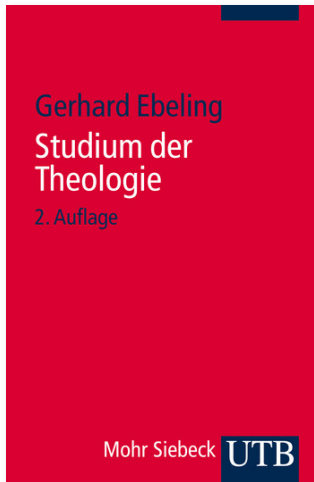

Published in German.

Gerhard Ebeling's book is a very good introduction to the study of theology. First presented as a lecture for beginners at the Faculty of Theology of the University of Zurich, it was then published as a book in 1975. It was later translated into English (Fortress, 1978; Collins, 1979). Ebeling's purpose was to give a global vision of theology by characterizing its general intention and by presenting every theological discipline in its specific role. He also integrated neighboring disciplines from outside theology, for example philosophy, the natural sciences and the humanities. Throughout the entire work, it was Ebeling's intention to avoid the danger of high specialization in the different disciplines by connecting these to each other. This new edition contains an afterword which presents the book in its historical context and compares it with other works of the last decades in the same field.

Gerhard Ebeling (1912–2001) 1938 Promotion; 1947 Habilitation; 1962 Gründer des Zürcher Instituts für Hermeneutik; langjähriger Professor für Kirchengeschichte bzw. Systematische Theologie in Tübingen und Zürich; von 1959–1989 Präsident der Kommission zur Herausgabe der Werke Martin Luthers.
