

Jürgen Faik

Verteilung und Umverteilung von Wohlstand

Bestandsaufnahme und Folgen der sozialen Polarisierung in Deutschland

[The Distribution and Redistribution of Wealth. Review and Results of Social Polarization in Germany.]

Published in German.

The debates on the inequality of income and wealth were reinvigorated by 2007's economic and financial crisis. Against this backdrop, Jürgen Faik sets out and discusses critically the tendencies of polarization in relation to the corresponding distribution of resources in Germany, taking into account perceptions of inequality among the populace. The author makes it clear that the observed polarization of wealth has already become a source of danger to political democracy in Germany and therefore puts forward solutions to reduce the existing inequality. These would include efficient target-group specific redistribution measures which should be financed by extended tax progression – and in particular through increased taxation of production factor capital.

Jürgen Faik Geboren 1963; 1983–95 Studium der Volkswirtschaftslehre und Soziologie; 1995 Promotion; 2014 Habilitation; derzeit Privatdozent für Gerontologie an der Universität Vechta.

2015. X, 170 pages.
