

Instructions to authors

Manuscripts must be in English, American spelling is preferred. Manuscripts should be typed double-spaced with wide margins. The editors are not responsible for damage or loss of papers submitted.

The **first page** of the manuscript should contain the following information:

1. title of the paper
2. name(s) of author(s)
3. date of submission
4. abstract (not exceeding 100 words)
5. keywords (up to five)
6. Journal of Economic Literature classification
7. A lead footnote should contain each author's affiliation, mail address, country of residence and sources of financial support, as well as any acknowledgements. The lead footnote of a paper by Joan Robinson and Adam Smith should have the format:

* Robinson: University of Cambridge, United Kingdom (robinson@econ.cam.ac.uk); Smith: Glasgow University, United Kingdom (Smith@gla.ac.uk). Financial support by the Research Fund of North-South Scotland is gratefully acknowledged.

Submitted manuscripts, which may qualify for publication, are peer reviewed by two referees. To support speedy decisions, the journal invites authors of a submission to include the editor's letter and the referee reports from a previous submission of this paper at other international journals. While FinanzArchiv reserves the right to use its own referees, in many instances the editors expect to be able to make an expedient decision based on the pre-existing reports and decision letters plus their own reading of the paper.

The final version of papers accepted for publication must be sent to the managing editor as a pdf-file and as a Winword or LaTeX file in order to allow for electronic formatting and language editing. In the final version of your paper, make sure that formulas in Word are still editable. Authors are kindly asked to comply with the following **format instructions**.

Sections and subsections should be numbered consecutively in Arabic decimals.

2. The Model
2.1 Complete Information
2.1.1 Homogeneous Agents

Footnotes should be numbered consecutively in Arabic numerals.

Figures and tables should be numbered consecutively in Arabic numerals. A short heading in italics should summarize the contents of each figure and table.

Table 1
GDP Growth in Economies A and B

Year	Economy A	Economy B
2000	3%	1%
2001	4%	2%
2002	3%	5%
2003	2%	6%

Displayed **formulas** should be numbered consecutively throughout the manuscript (including the appendix) as (1), (2), etc. on the right-hand side of the page.

$$F_K(K, L) = r \quad (1)$$

The **References** section should be the final section and contain all publications cited in the text or in footnotes, arranged alphabetically by the author's last name. Entries by the same author should be arranged by the year of publication, if necessary by adding lowercase letters, e.g., (1984a), (1984b), etc. Journal names should appear without first articles, i.e., "Quarterly Journal of Economics" rather than "The Quarterly Journal of Economics". Please capitalize the important words in Chicago Style. Issue numbers are not reported. References should appear as follows.

References in the text

References to tables, equations and figures should use lower case letters.

Section 2 of the paper will set out the model, while sections 3 and 4 will describe the data and the empirical results. As we will show in equation (6), the effect can be unambiguously signed.

References in the text to bibliographic items with three or more authors should use the first author and "et al.". The following style for in text references must be followed.

Early contributions to the literature (Miller, 1956) have shown that the variable is rarely significant, while recent papers using panel data have confirmed the theoretical expectation (Green, 1999; Blue, 2007; Hartford, 2009). As Wildasin (1991, p. 15; 1998, p. 397), Smith (2011, p. 201) and Smart (2007, 2008) have emphasized, mobility may imply the non-existence of a stable equilibrium.
