

# Beiträge zu normativen Grundlagen der Gesellschaft

Edited by Udo Di Fabio and Frank Schorkopf

This series offers an interdisciplinary forum for exploring institutional and normative questions to help deepen societal knowledge of the functioning and vulnerability of the institutions and socio-cultural foundations that make freedom possible. The aim is to develop an institutional concept that is situated between functional analysis and the theory of action. A clearer view of modern societies' normative structure is sought by bringing together work from the field of law with related subjects from sociology, economics, and history. BnGG is equally open to monographs, post-doctoral theses, outstanding dissertations, and thematically-fitting collections. Works accepted for inclusion are also eligible for funding from the Forschungskolleg normative Gesellschaftsgrundlagen (FnG based at Bonn University).

Nudging people towards making choices instead of coercing them is a technique already broadly used by the state. Indirect incentives and deterrents are used to steer citizens in a certain direction and reshape their wills. But is the concept of nudging compatible with the idea of autonomy, a guiding principle of the German constitution?

Stephan Gerg studies the constitutional standards pertaining to nudging, a form of imperceptible influence exerted on the citizens by the state apart from statutory requirements and prohibitions. These are for example moral appeals and an opt-out solution in organ donation law.

The key function of nationality law lies in its abstract ability to resolve the conflict between individual freedom and collective self-determination. Ferdinand Weber pleads for a status of »bound openness«, which interlinks the liberal state's respect of personal freedom and the need to preserve political self-determination in today's supranational legal pluralism.

Schieder, Tobias

## Ethisch motivierter Rechtsungehorsam

That one can find good ethical reason for breaking the law is without doubt. But can the ethical argument be translated into a legal one? Tobias Schieder traces the legal debate on the issue in the Federal Republic of Germany between 1949 and 1989, and shows how and why the debate on the legal concepts called on – the right to resist, freedom of conscience and civil disobedience – has shifted over time.

Thomalla, Klaus

## »Herrschaft des Gesetzes, nicht des Menschen«

The principle that laws and not people should govern is one of the ideas of the constitutional state. Yet this does not mean that this model first entered history with the conception of the constitutional state. Klaus Thomalla shows that talk about the rule of law is an essential topos in political philosophy whose foundations go back to the ancient world, late antiquity, and medieval times, permeating political philosophy's history of ideas like a *cantus firmus*.

The political system of society does not just consist of organisations focussed on official power. The interaction with other functional systems and internal requirements for communication necessitates a different, more abstract analysis of power and authority that reveals the relationships between institutions, the performance of functions, and the ideal amount of influence.
