

Handbuch zum Alten Testament

Edited by Jan Christian Gertz, and Reinhard Müller

In the *Handbuch zum Alten Testament*, all the books of the Hebrew canon and selected apocrypha have been translated and annotated. The *Handbuch zum Alten Testament* stands in the tradition of the *Kurzer Handkommentar* and was founded by Otto Eißfeldt. The commentary has a philological-historical focus and addresses all those who are looking for a scholarly reliable and understandable explanation of the Bible in its historical world. It also includes major primary and secondary sources from the ancient Near East in a translation.

A second section, covering the Old Testament Apocrypha, is to be edited by Matthias Henze and Jens Herzer.

This commentary builds on recent insights into the textual history of the Book of Jeremiah spurred by the manuscript discoveries at Qumran and the ensuing re-evaluation of the ancient translation of the book into Greek (Septuagint of Jeremiah). Hermann-Josef Stipp shows that situated in the historical contexts of their origins, the various literary units of the book emerge as tantalizing testimonies to the fervid theological battles fought in Judah about the correct interpretation of the traumata afflicting the Judeans during the sixth century BCE: the Babylonian empire's overwhelming power that according to the prophet Jeremiah had been bestowed on King Nebuchadnezzar by Yahweh himself; the total military defeat, the devastation of Jerusalem and the temple, the loss of kingship and statehood, the deportations into exile in 587, and eventually the efforts to re-consolidate the community of Yahweh-worshippers under less than encouraging circumstances that followed the onset of Persian rule in 539.
