Die Schriftenreihe *Mohr Siebeck Lehrbuch (MLB)* besteht seit mindestens 1968. Sie soll den gesamten Vorlesungsstoff ausgewählter Rechtsgebiete wissenschaftlich fundiert und didaktisch durchdacht aufbereiten, um Studierenden und Doktoranden – aber auch Wissenschaftlern und Praktikern – die Einarbeitung in neue Rechtsgebiete oder die Auffrischung vorhandenen Wissens zu ermöglichen. Die Reihe eröffnet damit Zugänge zu den klassischen Rechtsgebieten ebenso wie zu neuen Themenfeldern und Querschnittsfragen.

This volume deals with the contract law of the European legal systems. What are the essential rules of these systems on the formation and validity of contracts? What rules apply to a party's right to bring a claim for performance, to terminate the contract or to claim damages for breach? While the discussion is based on the national rules, they are taken into account only as local variations on a European theme. To what extent is it therefore possible to speak of a common European law of contract? What contributions do the »Principles of European Contract Law« and the proposal of the »Draft Common Frame of Reference« make? This book is not only aimed at helping to teach young European lawyers, but also strives to assist those engaged in the reform of national contract law or the drafting of uniform European legislation. The first 1996 edition of the volume has now been updated and completed.

This textbook provides a systematic exposition of EU contract law, including its foundations in EU primary law as well as details of the harmonization in secondary legislation. In the first part, the author discusses foundations in EU primary law, fundamental rights and fundamental freedoms, community competence for legislation in the area of contract law and the rules of conflicts of laws as provided by the Rome I Regulation. A chapter on consumers and businesses also discusses the harmonization concept. The second part focuses on general aspects of contract law: the prohibition of discrimination, rules on precontractual obligations, rights of withdrawal, contents and interpretation of contracts and judicial control of standard terms. In the third part, rules on specific types of contracts are discussed. The Consumer Sales Directive, the Consumer Credit Directive and the Package Travel Directive serve as examples to illustrate the author's conclusions.

Claus Ahrens deals with the protection of industrial property. He describes its basic dogmatic structures and its connection to related fields of law as well as the individual laws which go with it (for example patent law, trademark law and the law of the indication of geographical origin on goods). In doing so, he explores national, European and international law. The author's goal is to impart detailed knowledge and in addition knowledge of the entire system of industrial property rights as a development of general civil law. The work is addressed primarily to students but will however also appeal to those who are interested in the protection of industrial property.

## Kirchliches Arbeitsrecht

### Rechtsprechung und Diskussionsstand im Schnittpunkt von staatlichem Arbeitsrecht und kirchlichem Dienstrecht

2006. XVI, 378 pages.

ISBN 9783161486098  
paper 29,00 €

In this textbook, Gregor Thüsing examines church labor law as it pertains to labor law and church employment law. Apart from the government, the churches are the biggest employer in Germany. This fact alone demonstrates how important labor law is for churches as well. In the Weimar Constitution as well as in the German Basic Law, the churches were given the right to self-determination, which also has an effect on the evaluation of the relationship to the people they employ: church employment relations are »their own affair« as defined by Article 137 III 1 of the Weimar Constitution. If the dismissal protection act, the collective bargaining act or the works council constitution act are to be applicable for all, it must be born in mind when evaluating whether or not the dismissal is justified, a strike is permitted or if and in what form worker participation in decision-making is possible that the relationship between the church and their employees is a special one. Gregor Thüsing explains the special nature of this relationship.

## Völkerrechtsprechung

### Ausgewählte Entscheidungen zum Völkerrecht in Retrospektive

Hrsg. v. Jörg Menzel, Tobias Pierlings u. Jeannine Hoffmann

2005. XXV, 900 pages.

ISBN 9783161485152  
paper 39,00 €

This is a collection of reviews of famous, important and interesting decisions made by international and national courts, committees and panels in the field of international law. An emphasis is put on the decisions of the International Court of Justice and the European Court of Human Rights, but other courts and various committees are considered as well. National court decisions include Germany as well as the United States and a variety of other countries. The reviews explain backgrounds, analyze the reasoning, describe consequences and give references for further reading. Various introductions provide a systematic analysis of the various topics of international law.

In Europe, the international private law of non-contractual liability for damage is based largely on national legislation and judicial decisions. Thomas Kadner Graziano presents the solutions valid in the European countries for the central issues which are involved when dealing with this subject. In particular, he focuses on the law applicable to international torts in general, the significance of the parties' autonomy to determine the proper law, the law applicable to international traffic accidents, to environmental torts, product liability, liability for invasion of personal privacy, liability in competition and liability for pure economic losses, and also on the influence of competing international jurisdictions.

## Judex oeconomicus

12 höchstrichterliche Entscheidungen kommentiert aus ökonomischer Sicht

2003. XII, 284 pages.

ISBN 9783161481598  
paper 24,00 €

In this textbook, excerpts from 12 German appellate decisions are analysed by Hein Kötz and Hans-Bernd Schäfer from a legal and economic perspective. The authors wish to show what contribution economic analysis can make to solve practical cases in a way which is both efficient and consistent with the wording of the applicable statute. It turns out that while the results reached in some decisions withstand economic criticism, the results of other cases do not.

In his textbook, Ekkehart Stein conveys the current level of knowledge in jurisprudential methodology in a form which is not only comprehensible and practical but also demonstrates scholarly depth. He begins with a description of the general methodology pertaining to the application of the law, basing this on the theory of law, and then deals in detail with the special methodical features of the individual fields of law. In addition, he provides help with all those practical problems which can arise when writing scholarly papers.

What is the essence of comparative law, what are its functions and goals? The literal sense of the vocabulary comparative law implies that it is an intellectual precedence which, on the one hand, has to do with law and, on the other hand, has to do with comparison. This textbook introduces comparative law by distinguishing it from neighboring fields of jurisprudence such as private international law, international law, and legal history.
